Experience

Freelance

Self employment, 2021-present

I have applied the skills in a diverse manner; a few notable examples of what I have worked is: Configuring and maintaining Linux servers, using data engineering principles to gather and create useful insights through data science, to creating multi-tenant based web application software for the client to manage and deploy e-commerce websites.

Projects

BecomeTaxpayer, 2023 - Present

As the lead software engineer, my role is to coming up with the UXD to programming and deploying the project to production via a CI/CD pipeline.

DNBazar, 2024 - Present

As head IT Engineer for the company, my role includes not only managing the software aspect, such as UX Design, programming the web application and release it to production, but also communicating and strategizing in how to steer the project towards growth.

Education

Certifications

IBM

2022, Full Stack Web development

2023, DevOps & Software Engineering

2023, Data Engineering

Google

2023, IT Support

2023, Project Management

Stanford

2023, Algorithms

University

2023-2026, BSc Electrical Engineering, LUT

2023-2027, BSc Data Science & AI, IIT Guwahati

2023-2027, BSc Computer Science, Bits Pilani

Skillset

Python
TS/JS
Go
